

Customer shopping behavior is a loyalty story with three clear growth levers

A data-backed review of 3,900 customer purchases, category economics, and retention mechanics

Executive Readout · 2026 Strategy & Merchandising Review

TRANSACTION BASELINE

3,900 purchases reveal a steady \$59.76 customer baseline

DIMENSION	COVERAGE	COMMERCIAL TAKEAWAY
Geographic footprint	50 locations	Consistent nationwide presence without regional demand distortion.
Product diversity	25 products	Focused catalog allows concentrated inventory and marketing focus.
Customer satisfaction	3.75 / 5.00	Satisfied baseline, but leaves headroom for experience improvements.

EXECUTIVE READ

Optimize mix and retention

A large, predictable transaction base means growth cannot come from transaction volume alone. The commercial upside is in basket expansion, loyalty monetization, and protecting full-price margin.

Clothing carries the business, while accessories provide the next scale pool

Revenue and unit sales breakdown across all 3,900 customer purchases.

ASSORTMENT LEADERS

Revenue by category: Clothing is approximately \$90K, Accessories approximately \$70K, Footwear approximately \$30K, and Outerwear approximately \$15K

Sales volume: Clothing leads at approximately 1,800 sales, followed by Accessories at approximately 1,200

Product focus: Jewelry, Sunglasses, Belt, Blouse, Pants, Shirt, Sandals, Shoes, Sneakers, and Jacket lead their categories

Loyal customers dominate the base, but the subscription program is not changing spend

COHORT	CUSTOMERS	SHARE	AVG SPEND
Subscribers	1,053	27%	\$59.49
Non-Subscribers	2,847	73%	\$59.87

Discounts are attracting high spend, but some products may be over-dependent

Top five products ranked by percentage of total unit purchases completed with a discount applied.

High-spending discount users

839

Spent above the \$59.76 benchmark

STRATEGIC DECISION

Separate incremental demand

Nearly 50% of purchases in these five categories are discounted. Marketing must audit whether promotional price cuts generate incremental customers or simply discount sales that would have cleared at full price.

Top-rated products create a simple proof-point set for campaigns

Products with the highest average customer ratings across all logged reviews (catalog baseline is 3.75).

COMMERCIAL USE

Highest average ratings: Gloves 3.86, Sandals 3.84, Boots 3.82, Hat 3.80, and Skirt 3.78.

Commercial use: pair highly rated products with category leaders to strengthen merchandising and creative.

Watchout: ratings are strong enough to support positioning, but not so high that the experience can be ignored.

DEMOGRAPHIC DISTRIBUTION

Young adults are the largest revenue pool, with age groups otherwise close together

Total revenue delivered per demographic bracket, showing steady, balanced purchasing power across life stages.

Leading cohort revenue

\$62,143

Young Adult cohort leads catalog spend

STRATEGIC IMPLICATION

Balanced omni-demographic strategy

Middle-aged (\$59.2K), Adult (\$56.0K), and Senior (\$55.8K) trail young adults closely. Avoid skewing marketing exclusively to young shoppers; tailor creative messaging by life stage while anchoring to the catalog.

Three moves can turn a descriptive dashboard into commercial action

1. **Grow subscription value:** test exclusive benefits and measure whether subscribers increase spend, frequency, or retention
2. **Protect margin:** review the five most discount-dependent products and compare discounted versus full-price conversion
3. **Merchandise the winners:** feature category leaders and top-rated products in targeted campaigns

Use the dashboard as a decision system, not only a reporting surface.

The next review should measure lift, not just activity

A clear scorecard to track monetization impact against our established baseline metrics.

Next Quarterly Review · Q4 Strategy Cadence

Evaluating revenue lift, discount elasticity, and customer cohort progression.

FOCUS AREA	CURRENT BASELINE	SUCCESS MEASURE
Subscription	27% adoption · \$59.49 avg spend	Lift in subscriber spend and retention
Discounts	Hat, Sneakers, Coat, Sweater, Pants (~47–50%)	Higher full-price share & margin recovery
Segments	83 New · 701 Returning · 3,116 Loyal	Upward migration into Loyal tier
